

- Unbreakable powder-coated steel construction
- Complete with castor locks, ensuring the piano can be manoeuvred and secured easily
- Quality British design and manufacture
- Rubber shoes keep the instrument in position
- Available from all good music shops

Musisca Digital Piano Castors are high quality, heavy duty castors cleverly designed to fit almost any digital upright piano. They are particularly suited to models by Yamaha, Roland, Casio, and Kawai, with the traditional front leg design.

The high quality castors allow easy manoeuvrability, and their scratch-free wheels protect the floor.

The extra safe, low profile design raises the piano only 18mm off the ground, enabling you to play with the castors attached and also keeping a low ground clearance to aid stability. Brakes prevent the piano moving away from you while you play so you can perform with confidence, even on the most polished of floors.

THE ORIGINAL DIGITAL PIANO CASTOR

These heavy duty digital piano movers are shaped to fit virtually any model of upright style digital piano, particularly models by Yamaha, Roland, Casio and Kawai with the traditional 'front leg' design, including:
