

# More Kids, More Music, More Fun

“Colourful, affordable, adaptable and durable with a seriously good sound!”

Lisa O'Connor, Woodwind Teacher

The latest range of Nuvo single reed instruments (DooD, jSax and Clarinéo) all feature a new and improved mouthpiece section with integral ligature, more durable and easier to open with one hand than the original. As well as Nuvo's synthetic reeds, these mouthpieces are compatible with cane ones too - Eb clarinet and soprano saxophone reeds fit best.

Each model is available in a selection of colours and comes with everything you need to play straight out of the box. For learning materials and ensemble ideas, check out [www.nuvo-windstars.com](http://www.nuvo-windstars.com)

## Recorder+

The **Nuvo Recorder+** introduces the first major innovations to the recorder world for many years. Patented silicone key covers make it easier to cover tone holes – the resulting reduction in frustrating squeaks makes learning more fun allowing teachers to capitalise on students' enthusiasm. Three detachable rubber rings on the bell section can be used as a reward system to motivate players as they reach learning milestones.

It has a fully chromatic range of more than 2 octaves and uses identical fingering to a normal recorder, but its slightly larger tone holes means the **Recorder+** produces a warmer sound. Each instrument comes with a neat moulded case and a recorder fingering chart.

**Weight: 85g | Length: 33cm**

**RRP: £14.99**

## TooT

The **Nuvo TooT** is the ideal instrument for absolute beginners looking to take their first steps into woodwind playing.

It is similar to a fife, but the wider bore allows the instrument to be a bit shorter and brings the tone holes closer to the body, and it features four double holes to make chromatic playing easier. It comes supplied with a carry case, fingering chart, and recorder-style 'firstnote' lip plate.

**Weight: 150g | Length: 32.5cm**

**RRP: £31**

## DooD

The **Nuvo DooD** gives music educators the opportunity to introduce young children to single reed wind instruments earlier than ever before. Its simple design makes the DooD almost indestructible and bridges the learning gap between recorders and more complicated woodwind instruments.

It utilizes the same fingering system as a recorder with a chromatic range of one octave, and its pleasant mellow timbre would make a great addition to any primary music ensemble. Every DooD comes supplied with a case, 2 synthetic reeds, and a fingering chart.

**Weight: 130g Length: 35.5cm**

**RRP: £31**

## jFlute

The **Nuvo jFlute 2.0** has arrived! New features include:

- Revolutionary 'donut' head joint brings the keywork closer to the body while keeping the lip plate in line
- Better secured key extensions significantly improve stability
- Soft-touch nickel-free silicone key caps make for more comfortable fingering and a splash of colour
- Sleek new case with sturdy press stud fasteners to keep your instrument safe!

The **jFlute** is a fully functional flute made from resilient waterproof plastic, designed with young beginners in mind. It is considerably smaller and lighter than a normal flute owing to a cleverly shaped curved head joint and removal of a foot section altogether. These bits can be replaced with parts from the **jFlute upgrade kit** as players grow in size and confidence.

Key features include a 'firstnote' lip plate with removeable recorder-style fipple to help youngsters through their first few lessons without getting discouraged by tricky embouchure technique. Keywork is also adapted to include left-hand extensions making difficult stretches easier for small hands, and it has a fully chromatic range of 2.5 octaves.

**Weight: 220g | Length: 49cm**

**RRP: £135**

**BRAND NEW FEATURES**

**NEW FINISHES AVAILABLE**

## Student Flute

The **Nuvo Student Flute 2.0** with ergonomically improved body shape has been highly acclaimed by teachers and professional musicians worldwide.

As well as a perfect instrument for beginners (includes 'firstnote' lip plate), it also makes an exciting alternative for amateur flautists or a useful rehearsal instrument for accomplished professional players. It has an equivalent range to a traditional flute, produces a beautiful

responsive tone, weighs around half as much, and is extremely durable and easy to maintain.

**Weight: 350g | Length: 66cm**

**RRP: £179**

## Clarinéo

The **Nuvo Clarinéo** is a lightweight C clarinet perfectly suited to beginners. An ingenious compact design helps younger players reach difficult stretches and reduces playing fatigue thereby encouraging practice.

The fingering is identical to a standard Bb clarinet, so the transition is easy once students are ready. It makes a warm rounded sound just like a wooden instrument and has a full chromatic range of 3.5 octaves.

**Clarinéo 2.0** features some notable upgrades including soft-touch nickel-free key caps, silicone pads for improved reliability and even seating, and a new ultra-strong silicone bell. Each one comes with a hard case, 4 reeds (3 synthetic & 1 cane), a pull-through cleaning cloth, and a pot of O-ring grease.

**Weight: 265g | Length: 59cm**

**RRP: £133**

## jSax

The **Nuvo jSax** enables beginners to develop embouchure and tuning skills which are directly transferable to a full-size saxophone. Like all Nuvo instruments, it is pitched in C to ease integration into classroom music-making, and it produces a versatile and satisfyingly rich tone across its fully chromatic range of 1.5 octaves.

Its robust construction and straightforward configuration mean the **jSax** requires very little maintenance – it's also completely waterproof and can be cleaned with warm soapy water. Each one comes with 2 synthetic reeds, a hard case, and a carry strap.

There is an extra **Straighten your jSax kit** available for adults who have difficulty manoeuvring their larger hands around the instrument.

**Weight: 260g | Length: 44cm**

**RRP: £99**

(Straighten your jSax: + £15)
